Data inconsistencies: 9 Nov source data workbook

File checked: BIMBO_MIPS_WMS_ODI_Data_9th_NOV (1).xlsx (latest version, 10 Nov 2026). Item 76108, plant UBD, sales date 12 Sep 2026.

The quantities add up: orders 14,339 + forecast 41,769 - allocated 473 - available 7,000 = work order 48,635, and WMS on hand 7,473 = available 7,000 + allocated 473. The points below are where the sheets disagree with each other or with the column definitions. Items 1 to 5 change how the checks work, so we need an answer on them. Items 6 to 11 are smaller. The last page shows how our seeded demo data differs from the workbook.

1. Requested ship date differs between Sales Orders and ODI

Both columns are defined as the date the goods must be shipped. Sales Orders has 12 Sep on every line; the ODI mapping has 10 or 11 Sep for the same orders.

Order number	Customer	Sales Orders (col L)	ODI (col F)
2263245	ALBANY NY (PROSPECT RD) BAKERY	12-Sep-2026	11-Sep-2026
91220263121003	BBU_BAY SHORE NY ST	12-Sep-2026	11-Sep-2026
91220262951003	BBU_LANCASTER NY CMB	12-Sep-2026	11-Sep-2026
91220263101003	BBU_LANCASTER NY IBP	12-Sep-2026	11-Sep-2026
91220262941003	BBU_MASPETH NY PAGE	12-Sep-2026	11-Sep-2026
91220262931003	BBU_MASPETH PAGE AR	12-Sep-2026	10-Sep-2026
2266620	CANASTOTA NY DISTRIBUTION CENTER	12-Sep-2026	10-Sep-2026
2263257	CHICOPEE MA DISTRIBUTION CENTER	12-Sep-2026	10-Sep-2026
2263254	COLONIE NY DISTRIBUTION CENTER	12-Sep-2026	10-Sep-2026
2263248	MILLBURY MA (LATTI FARM RD) DISTRIBUTION CENTER	12-Sep-2026	10-Sep-2026
2263256	WILMINGTON MA DISTRIBUTION CENTER	12-Sep-2026	10-Sep-2026
FC001 (forecast)	-	-	10-Sep-2026

Question: which date is correct? Or does the ODI date mean something different (for example, the date the plant ships to the depot)? The late-wrapping check uses this date.

2. Wrapping finished before the work order was created or started

Value	Sheet / column	Date
Wrapping start	ODI, col P	09-Sep-2026 17:34
Wrapping end	ODI, col Q	09-Sep-2026 22:08
Work Order Date (date the work order was created)	ODI, col M	12-Sep-2026
Schedule Date	ODI, col B	12-Sep-2026
Production Date	MIPS, col A	12-Sep-2026
Work order start date	MIPS, col K	12-Sep-2026
Work Order Completion Date	MIPS, col L	12-Sep-2026

Question: should the work order dates be on or before 9 Sep, or the wrapping dates be on or after 12 Sep?

3. WMS stock does not include the finished goods that were wrapped

Value	Figure
Wrapped (work order WO-UBD-20260912-001), finished 09-Sep-2026 22:08	48,635
WMS on hand	7,473
WMS on hand if the wrapped goods had arrived (7,473 + 48,635)	56,108
Date/time of the WMS snapshot	not given

The Considerations sheet says finished goods move from MIPS to WMS before shipment. **Question:** when was the WMS snapshot taken? Can the WMS sheet carry a snapshot date and time?

4. Nine forecasts have no orders, ODI mapping, stock or work order

Only 76108 (FC001) flows through to ODI, WMS and MIPS. The other nine forecasts stop at Oracle.

Forecast ID	Item	Description	Forecast qty
FC002	950513	BP BUTTER HOT DOG BUNS 8P 15Z	3,000
FC003	967517	ART BRI HD BN BAG 8P 16Z	500
FC004	76105	BP WHITE HAMBURGER BUNS 8P 15Z	6,677
FC005	950514	BP BUTTER HAMBURGER BUNS 8P 16Z	6,544
FC006	950996	ART BRI HAM BN BAG 8P 16Z	33,445
FC007	150080	ST DUTCH COUNTRY 100 WW BREAD 4.49 24Z	35,544
FC008	77442	GV WHITE SANDWICH BREAD 20Z	34,578
FC009	76003	SL S N S MWGW ROUND TOP BREAD 20Z	4,323
FC010	74556	ST KING WHITE SANDWICH BREAD 22Z	4,321
		Total with no work order	128,932

Question: are these planned but not yet scheduled (no issue), or should each one have an ODI row and a work order (a missing-work-order issue)?

5. Forecast and firm orders are added together

	Forecast added to orders (as in the workbook)	Orders taken out of the forecast
Demand	14,339 + 41,769 = 56,108	41,769
Work order (demand - 473 - 7,000)	48,635	34,296

Usually firm orders use up part of the forecast, so the two are not added. If that applies here, the work order is 14,339 units too high. **Question:** please confirm adding them is intended.

6. One batch for the whole work order

Value	Figure
Work order quantity	48,635 units
MIPS Sched Batches / Act Batches Mixed (ODI cols X, Y)	1 / 1
Wrapping time (17:34 to 22:08)	4 h 34 min (about 10,600 units an hour)

One batch for 48,635 buns looks unlikely. Please confirm the batch counts.

7. Price: column name and basis

Value	Found
Column header in Sales Orders (col N)	Price in $
Column name in BIMBO_Column_Meanings.docx	Price
Price on all 11 lines (store and BBU_ customers alike)	4.69
Price for the other nine items	not given

Please confirm 4.69 is per sellable unit (one 8-pack) and the same for every customer, and give prices for the other items.

8. Item description differs in ODI

Sheet / column	Description for 76108
ITEM Master, Sales Orders, WMS, MIPS (FG Description)	BP WHITE HOT DOG BUNS 8P 14Z
ODI, col W (MIPS Description)	Ball Park Hot Dogs

"Hot Dogs" and "Hot Dog Buns" are different products. Please confirm the ODI value.

9. Order type and order number format

Customers	Order number format	Order Type
6 store / distribution centre customers	7 digits, e.g. 2263245	DSD_SALES_ORDER
5 BBU_ customers	14 digits, e.g. 91220263121003	DSD_SALES_ORDER

The BBU_ orders look like a different kind of order (for example, inter-company). Please confirm the order type.

10. Codes stored as numbers in some sheets and as text in others

Field	Stored as	Example
Item Number (all sheets)	text	'76108'
Order Number (Sales Orders col A, ODI col H)	number	91220263121003 (14 digits)
FG BUSS Code (Sales Orders col G, MIPS col D)	number	2771

Excel keeps only 15 digits of a number, so an order number one digit longer would be silently changed. Please send order numbers and codes as text.

11. Smaller points

Where	Found
Sales Orders, row 7, col F	Ship-To Location blank for order 91220262931003 (BBU_MASPETH PAGE AR)
ITEM Master, items 3006 Yeast and 3009 Butter	UOM 'Units'; other ingredients use KG, CAN or BAG
Sheet2 notes	"BUZZ" written for BUSS
ODI headers	"Forcast" spelling; "Quantity" has a trailing space; "Allocated quantity for SO" has a double space and a trailing space
WMS and MIPS headers	"Available quantity" and "Work order start date" have a trailing space
MIPS sheet	1 data row, but formatted down to row 69

Overview: our seeded demo data compared with the workbook

The demo starts from a seeded copy of the workbook. This page lists what differs.

1. Kept exactly as in the workbook

Sheet	In the seed
ITEM Master	All 19 items (10 finished goods, 9 raw materials), unchanged
Oracle Planning & Forecast	All 10 forecasts (FC001 to FC010), unchanged
76108 on every sheet	Value for value: 11 orders at $4.69, FC001, 12 ODI rows, WMS stock, work order WO-UBD-20260912-001 for 48,635. It balances (no issues).
The inconsistencies above	Kept as they are (ship dates, wrapping dates, and so on). The seed does not correct them.

2. Added

What	Why
A row ID on three sheets: SO Line ID (e.g. 2263245-1), ODI Entry ID (ODI-0001), Inventory ID (INV-0001)	These sheets have no unique row ID; the system needs one to track changes to a row
Two more items, 950513 and 76105, on Sales Orders, ODI, WMS and MIPS	To show issues in the demo. Their forecasts (FC002 3,000 and FC004 6,677) are from the workbook; everything else for them is made up
Prices for the two added items: 950513 $4.99, 76105 $4.69	The workbook only prices 76108

3. The two added items

	950513 BP BUTTER HOT DOG BUNS	76105 BP WHITE HAMBURGER BUNS
Sales orders	3 orders, 2,200 units (Albany 1,200, Canastota 640, Chicopee 360)	4 orders, 4,120 units (Albany 2,400, Colonie 900, Millbury 520, Wilmington 300)
Forecast	3,000	6,677
WMS on hand / available / allocated	1,500 / 1,140 / 360	1,900 / 1,500 / 300
Correct work order (demand - allocated - available)	5,200 - 360 - 1,140 = 3,700	10,797 - 300 - 1,500 = 8,997
MIPS work order	WO-UBD-20260912-002 for 4,840	WO-UBD-20260912-003 for 8,997
Line, shift, batches (scheduled / mixed)	Line 1, Shift B, 4 / 5	Line 2, Shift B, 3 / 3

4. Mismatches built in on purpose (5 issues the demo shows)

Item	Mismatch	Values
950513	MIPS did not subtract available stock	Work order 4,840; should be 3,700 (1,140 too many)
950513	One batch more mixed than scheduled	Scheduled 4, mixed 5
76105	ODI has an old copy of an order	Colonie order 2263255: BUSS 900, ODI 800
76105	WMS stock does not add up	On hand 1,900; available 1,500 + allocated 300 = 1,800
76105	Wrapped after the requested ship date	Albany order 2263247 (2,400): ship date 09-Sep, wrapping ended 10-Sep 09:45
